SuperUser

Android application which controls the phone, Restricting the user from being the main Super User.

SuperUser application helps the user to make themselves get rid of the Addiction towards their phone. SuperUser allows to controls the phone usage of the User/mobile Owner.

SuperUser app works when the user needs to concentrate on some work and he should not get distracted by the mobile /mobile activities.

So the user comes to the app SuperUser and then gives the control of the phone entirely to this app. This will prevent the user from unknowingly getting distracted over the phone.

The user will give permissions to the app to lock the Phone for a certain amount of time until the user completes his work.

In the locking period the user won't have access to any feature of the Phone but will have the emergency facility to make calls which is also under limit.

This feature of the phone will mainly affect over the people who are addicted to their mobile and to those people who lack concentration towards studies.
